Western
UNIVERSITY • CANADA

What is the Human Environments Analysis Laboratory (HEALab)?

The HEALab is a state-of-the-art, interdisciplinary research and training environment at Western University. The HEALab specializes in the production, evaluation, synthesis, dissemination and mobilization of evidence to support effective policies, programs and professional practice aimed at creating healthy and vibrant communities. We examine social and physical environments from the scale of entire regions down to the level of individual buildings or open spaces and their inhabitants. We specialize in community-based participatory research and applications of Geographic Information System (GIS) for urban planning and public health.

What is the Human Environments Analysis Laboratory Youth Advisory Council (HEALYAC)?

The purpose of the HEALYAC is to integrate youth expertise into the HEALab's research on youth health. The YAC is how we implement an overarching participatory approach that sees research as *with* and *for* youth. By establishing a YAC, we are positioning youth input as integral to shaping both the topics we study, and decision-making at the level of specific projects.

JOIN THE HEALYAC.

Bi-Weekly Meetings on Thursdays at 6.

Who Can Apply?

All high school students in London, ON and surrounding area who are willing to help make a change in the community can apply.

Those who are particularly interested in health, social, or community issues, as well as academic research, are encouraged to apply.

VOLUNTEER HOURS

With the HEALYAC, you can gain valuable volunteer hours while making an impact on the community.
